# SECTION C: Accounting system

The purpose of an accounting system is to: 1) accurately record all financial transactions, and 2) ensure that financial transactions are supported by invoices, timesheets or other documentation. The type of accounting system often depends upon the size of an organization. Some organizations may have computerized accounting systems while others use a manual system to record each transaction in a ledger.

In all cases, IFES' subaward funds must be properly authorized, used for the intended purpose and recorded in an organized and consistent manner.

#### **SECTION D: Funds Control**

IFES' subrecipients receiving advances of subaward funds must maintain a separate bank account for IFES' funds. Access to the bank account should be limited to authorized individuals. Bank balances should be reconciled periodically to the accounting records. If cash cannot be maintained in a bank, it is very important to have strict controls over its maintenance and disbursement.
